

Askarov Anet

anet@seoultech.ac.kr ♦ Seoul, KR

WORK EXPERIENCE

Milior Logistics May 2021 – August 2021
IT Security Monitoring Intern Astana, KZ

- Leveraged GPS tracking technology to monitor vehicle assets and enhance security protocols.
- Collaborated with the security department to analyze tracking data and assist in the recovery of stolen materials..
- Implemented system improvements to optimize real-time monitoring and incident response efficiency.
- Gained hands-on experience with identifying vulnerabilities and applying security measures in a real-world environment.

PROJECTS

- **Secure Network Lab (2023):** Configured firewalls, routers, and VLANs; tested and documented common vulnerabilities in a controlled lab environment.
- **Python Automation Scripts (2023):** Built small scripts to automate log analysis and repetitive monitoring tasks.
- **Database Security Case Study (2024):** Conducted SQL injection testing on a sample database; designed mitigation strategies to prevent attacks.

EDUCATION

Seoul National University of Science and Technology December, 2027
BS, Computer Science Seoul, KR

- Pursuing a Computer Science degree with a 3.41/4.0 GPA.
- Achieved IT Essentials certification from Cisco, currently working on different projects.

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- CompTIA Security+

SKILLS

Cybersecurity: Network security, vulnerability analysis, incident response, security protocols

Programming Languages: Python, C, C++, Java, C#, Object-Oriented Programming (OOP)

Tools & Technologies: GPS tracking systems, Pygame, SketchUp, security monitoring tools

Soft Skills: Problem-solving, effective communication, adaptability to new technologies

PROFESSIONAL SUMMARY

Motivated Computer Science major with hands-on experience in cybersecurity and a foundation in programming languages such as C, C++, and Python. Passionate about leveraging technology to create innovative solutions in the IT field.
